INTELLIGENT POOL FILTER

An innovative water-filtration system available in multiple configurations to suit every type of swimming pool. Reduces problems and eliminates complicated pipework. Every model delivers fine filtration down to 5 microns.

iPANEL LINER POOL FILTER

Wall-embedded filter for iPanel Liner Pool

- An exclusive innovation by J.D. Pools — conceived, designed and developed to combine beauty with maximum performance. Officially patented.
- Smooth design with nothing protruding into the pool — does not intrude on the usable swimming area.
- Made from high-quality fiberglass, strong and built for long-term use.
- Easy, fast and uncomplicated installation. Compact footprint no separate pump room or water storage tank required.
- Pipeless system — no wall drilling needed, which reduces the risk of cracked or leaking pipes and lowers future maintenance.

Maximum Filtration Performance with a Two-Stage Filter

Stage 1: A coarse strainer basket captures larger debris such as leaves, twigs, insects and other outside material, preventing it from entering the main filter and reducing clogging.

Stage 2: A cloth filter bag handles fine debris such as dust, sediment and small particles suspended in the water, with filtration precision down to 5 microns. Keeps the pool water clean and clear, and is easy to remove and rinse out.

iP Liner Pool Filter TE25

Wall-embedded filter for iPanel Liner Pool. Designed for medium-to-large pools, with an integrated pump room and a dual filter-bag system.

Specifications

MODEL	TE25
Power (Hp)	1.75 (47/22)
Rate (m³/hr)	25
Precision of filtration	5µ
Pool Volume (m³)	100
Pool Light	LED

iP Liner Pool Filter TE25-R

Wall-embedded filter for iPanel Liner Pool. Designed for medium-to-large pools, with a separate pump room and a dual filter-bag system.

Specifications

MODEL	TE25-R
Power (Hp)	1.75 (47/22)
Rate (m³/hr)	25
Precision of filtration	5µ
Pool Volume (m³)	100

iP Liner Pool Filter TE20-R

Wall-embedded filter for iPanel Liner Pool. Designed for small-to-medium pools, with a separate pump room and a single filter-bag system.

Specifications

MODEL	TE20-R
Power (Hp)	1.25 (47/16)
Rate (m³/hr)	20
Precision of filtration	5µ
Pool Volume (m³)	80

CONCRETE LINER POOL FILTER

Wall-embedded filter for Concrete Liner Pool

- Purpose-built for concrete-structure pools finished with a PVC liner.
- Smooth design with nothing protruding into the pool does not intrude on the usable swimming area.
- Made from high-quality fiberglass, strong and built for long-term use.
- Easy, fast and uncomplicated installation. Compact footprint no separate pump room or water storage tank required.
- Pipeless system — no wall drilling needed, which reduces the risk of cracked or leaking pipes and lowers future maintenance.

Maximum Filtration Performance with a Two-Stage Filter

Stage 1 : A coarse strainer basket captures larger debris such as leaves, twigs, insects and other outside material, preventing it from entering the main filter and reducing clogging.

Stage 2 : A cloth filter bag handles fine debris such as dust, sediment and small particles suspended in the water, with filtration precision down to 5 microns. Keeps the pool water clean and clear, and is easy to remove and rinse out.

Concrete Liner Pool Filter *CL25*

Wall-embedded filter for concrete liner pools. Designed for medium-to-large pools, with an integrated pump room and a dual filter-bag system.

Specifications

MODEL	CL25
Power (Hp)	1.75 (47/22)
Rate (m³/hr)	25
Precision of filtration	5μ
Pool Volume (m³)	100

Concrete Liner Pool Filter *CL20*

Wall-embedded filter for concrete liner pools. Designed for small-to-medium pools, with an integrated pump room and a single filter-bag system.

Specifications

MODEL	CL20
Power (Hp)	1.25 (47/16)
Rate (m³/hr)	20
Precision of filtration	5μ
Pool Volume (m³)	80

Concrete Liner Pool Filter *CL25-R*

Wall-embedded filter for concrete liner pools. Designed for medium-to-large pools, with a separate pump room and a dual filter-bag system.

Specifications

MODEL	CL25-R
Power (Hp)	1.75 (47/22)
Rate (m³/hr)	25
Precision of filtration	5μ
Pool Volume (m³)	100

Concrete Liner Pool Filter *CL20-R*

Wall-embedded filter for concrete liner pools. Designed for small-to-medium pools, with a separate pump room and a single filter-bag system.

Specifications

MODEL	CL20-R
Power (Hp)	1.25 (47/16)
Rate (m³/hr)	20
Precision of filtration	5μ
Pool Volume (m³)	80

CONCRETE TILE POOL FILTER

Wall-embedded filter for Concrete Tile Pool

- Purpose-built for concrete tile-finished swimming pools.
- Smooth design with nothing protruding into the pool — does not intrude on the usable swimming area.
- Made from high-quality fiberglass, strong and built for long-term use.
- Easy, fast and uncomplicated installation. Compact footprint no separate pump room or water storage tank required.
- Pipeless system — no wall drilling needed, which reduces the risk of cracked or leaking pipes and lowers future maintenance.

Maximum Filtration Performance with a Two-Stage Filter

Stage 1: A coarse strainer basket captures larger debris such as leaves, twigs, insects and other outside material, preventing it from entering the main filter and reducing clogging.

Stage 2: A cloth filter bag handles fine debris such as dust, sediment and small particles suspended in the water, with filtration precision down to 5 microns. Keeps the pool water clean and clear, and is easy to remove and rinse out.

Concrete Tile Pool Filter CT25

Wall-embedded filter for concrete tile pools. Designed for medium-to-large pools, with an integrated pump room and a dual filter-bag system.

Specifications

MODEL	CT25
Power (Hp)	1.75 (47/22)
Rate (m³/hr)	25
Precision of filtration	5µ
Pool Volume (m³)	100

Concrete Tile Pool Filter CT20

Wall-embedded filter for concrete tile pools. Designed for small-to-medium pools, with an integrated pump room and a single filter-bag system.

Specifications

MODEL	CT20
Power (Hp)	1.25 (47/16)
Rate (m³/hr)	20
Precision of filtration	5µ
Pool Volume (m³)	80

Concrete Tile Pool Filter CT25-R

Wall-embedded filter for concrete tile pools. Designed for medium-to-large pools, with a separate pump room and a dual filter-bag system.

Specifications

MODEL	CT25-R
Power (Hp)	1.75 (47/22)
Rate (m³/hr)	25
Precision of filtration	5µ
Pool Volume (m³)	100

Concrete Tile Pool Filter CT20-R

Wall-embedded filter for concrete tile pools. Designed for small-to-medium pools, with a separate pump room and a single filter-bag system.

Specifications

MODEL	CT20-R
Power (Hp)	1.25 (47/16)
Rate (m³/hr)	20
Precision of filtration	5µ
Pool Volume (m³)	80

Concrete Tile Pool Filter PF20 BIKINI

- Sport silhouette — slim and contemporary.
- Easy to install — ideal for pool renovations where the existing filtration system has problems.
- Pipeless system — no risk from drilling through walls.
- Built-in LED underwater light.
- Can be fitted with a built-in counter-current swim jet.
- Fully automatic operation.

Specifications

MODEL	PF20 BIKINI
Power (Hp)	1.25 (47/16)
Rate (m³/hr)	20
Precision of filtration	5µ
Pool Volume (m³)	80
Net Weight (kg)	65
